

New Breast Pump Order Process for Commercial Members

As of **November 1, 2020**, the updates below were put into effect for all Denver Health Medical Plan (DHMP) Exchange and Large Group member breast pump orders:

- » Pregnant mothers and expectant or postpartum parents are entitled to receive a breast pump as a benefit of their DHMP Commercial health plan coverage
- » Breast pumps will be provided by Rocky Mountain Medical Equipment (RMME)
- » A standard quality breast pump by Medela will be issued
- » Providers will need to submit an order for the mother/parent to obtain the breast pump at or after 28 weeks
- » The order can be **faxed to RMME at 303-806-8030**
- » RMME accepts electronic orders **emailed to orders@rockymtnmedical.com**
- » No prior authorization is required for the standard breast pump (but it will still be required for the hospital grade breast pumps)
- » DHMP Commercial members have a breast pump allowance of \$150, which will fully cover the standard quality breast pump from Medela
- » If the mother/parent selects a Medela breast pump with a higher value than the allowance, then the mother/parent will pay the price difference directly to the vendor
