

Quality Improvement: Early Periodic Screening and Diagnostic Testing (EPSDT)

Early and Periodic Screening, Diagnostic and Treatment (EPSDT) is a Health First Colorado program (**Colorado's Medicaid Program**) that covers prevention, diagnostic and treatment services for members aged 20 and under, as well as pregnant women. This program is set up to find health problems early. The program goal is for children to get the physical, mental, vision, hearing, and dental care they need for their health. The program goal for pregnant women is to get prenatal services timely and regularly to support healthy mom and baby. These benefits are available at no extra cost to the member. A PCP should see the member within 30 days of request for an appointment.

WHAT ARE EPSDT INTENTIONS?

- » Assuring availability and accessibility of required health care services
