A request for a health care service or course of treatment with respect to which the time periods for making a non-urgent care request determination:

- a. Could seriously jeopardize the life or health of the covered person or the ability of the covered person to regain maximum function; or for persons with a physical or mental disability, create an imminent and substantial limitation on their existing ability to live independently;
- b. In the opinion of a physician with knowledge of the covered person's medical condition, would subject the covered person to severe pain that cannot be adequately managed without the health care service or treatment that is the subject of the request; or
- c. Could seriously jeopardize the enrollee's ability to attain, maintain or regain maximum function.

If you submit an urgent request, please provide supporting documentation to show why the request meets the above definition of urgent. Urgent requests that do not meet the above definition will be downgraded to routine requests, and will be completed within the timeframes for making non-urgent (standard) requests.
