

# Denver Health Medical Plan Elevate Exchange, Colorado Option and Peak Formulary Administered by MedImpact

Effective April 2024

## Foreword

This document represents the efforts of the MedImpact Healthcare Systems Pharmacy and Therapeutics (P & T) and Formulary Committees to provide physicians and pharmacists with a method to evaluate the safety, efficacy and cost-effectiveness of commercially available drug products. A structured approach to the drug selection process is essential in ensuring continuing patient access to rational drug therapies.

This is accomplished through the auspices of the MedImpact P & T and Formulary Committees. These committees meet quarterly and more often as warranted to ensure clinical relevancy of the Formulary. To accommodate changes to this document, updates are made accessible as necessary.

**Access to the most current version of the Denver Health Medical Plan (DHMP) Elevate Formulary can be obtained by visiting [www.elevatehealthplans.org](http://www.elevatehealthplans.org).**

The MedImpact P & T and Formulary Committees use the following criteria in the evaluation of drug selection for the Marketplace Exchange Standard Formulary:

- Drug safety profile
- Drug efficacy
- Comparison of relevant therapeutic benefits to current formulary agents of similar use, and to minimize therapeutic duplication where possible
- Cost-effectiveness relative to comparable therapies

## How to Use the Formulary

The Formulary is a list of medications available to MedImpact members under their pharmacy benefit. All drugs are listed by their generic names and most common proprietary (branded) name. The Formulary may be accessed by using the index, either by generic or proprietary name and by therapeutic drug category. In situations where an FDA-approved generic equivalent is available, brand names are listed for reference purposes only, and do not denote coverage for the brand, unless specifically noted.

All drugs are listed in each category in alphabetical order by generic name. Where an FDA-approved generic is available for the listed generic name, the generic name is **bolded**.

For certain agents within the Formulary, a recommended prescribing guideline may apply. These are denoted throughout the document using the following symbols:

Symbol	Guideline	Description
AGE	Age Edit	Coverage may depend on patient age
G	Gender Edit	Coverage may depend on patient gender
PA	Prior Authorization	Requires specific physician request process
QL	Quantity Limit	Coverage may be limited to specific quantities per prescription and/or time period
ST	Step Therapy	Coverage may depend on previous use of another drug

Please refer to the prescribing guideline appendix within this document for details regarding specific agents.

## Benefit Coverage and Limitations

This printed Formulary does not provide information regarding the specific coverage and limitations an individual member may be subject to. Many members have specific benefit inclusions, exclusions, copays, or a lack of coverage, which are not reflected in the Formulary.

The Formulary applies only to outpatient drugs provided to members, and does not apply to medications used in inpatient settings. If a member has any specific questions regarding their coverage, they should refer to their plan's Member Handbook or contact their plan's Member Services at (303) 602-2090 or toll free at 1-855-823-8872. TTY/TDD users should call 711.

## Depending upon a member's specific benefit parameters, the following topics may apply:

### 1. Generic Substitution

When available, FDA-approved generic drugs are to be used in all situations, regardless of the brand name indicated. The generic names are bolded in the formulary listing wherever an FDA-approved generic drug product is

available. Greater economy is realized through the use of generic equivalents. This policy is not meant to preclude or supplant any state statutes that may exist. All drugs that are or become available generically are subject to review by MedImpact's Pharmacy and Therapeutics Committee.

MedImpact approves such multi-source drugs for addition to the MAC list based on the following criteria:

- A multi-source drug product manufactured by at least one (1) nationally marketed company.
- At least one (1) of the generic manufacturer's products must have an "A" rating or the generic product has been determined to be unassociated with efficacy, safety or bioequivalency concerns by the MedImpact P & T Committee.
- Drug product will be approved for generic substitution by the MedImpact P & T Committee.

This list is reviewed and updated periodically based on the clinical literature and pharmacokinetic characteristics of currently available versions of these drug products.

If a member or physician requests a brand name product in lieu of an approved generic, the member, based upon their coverage, will typically be required to pay the difference in cost between the brand and the generic. If a physician determines that there is a documented medical need for the brand equivalent, a request for coverage may be made using the medication request process.

• **Important Note for Contraceptives:**

The plan will cover, at no cost to the member, any necessary contraceptive product and will defer to the member's provider's determination. This coverage includes brand names of generic products when a provider determines them to be medically necessary.

## 2. Tier Benefit Design

The Formulary may be applied to a tier benefit design, where the member shares the cost of prescription drug therapy based on the drug's tier and copayment or coinsurance. In most instances, generically available drugs will be covered in a separate lower tier (low copay), preferred branded drugs listed on the Formulary will be covered under a higher tier, and branded drugs not on the Formulary will be covered under a separate non-preferred branded drug copay tier. Specialty drugs will be covered under the highest tier (highest copay). Essential health benefit/preventative medications, if available on your plan's formulary (applies to new and non-grandfathered plans), will be covered without cost sharing (zero copay).

## Tier Definitions

- Tier 1: EHB Zero Copay/Preventative
- Tier 2: Generic medications (formulary agents)
- Tier 3: Preferred brand medications (formulary agents)
- Tier 4: Non-preferred brand/Preferred specialty medications (non-formulary agents when formulary exception is approved by plan)
- Tier 5: Specialty medications (30-day supply max)
- Tier 6: Medical medications (not covered under the pharmacy benefit)

## 3. Medication Request Process

Depending upon plan benefit design, a medication request process may apply as follows:

### A. Coverage Exceptions

Drugs that are listed in the Formulary with associated Prior Authorization (PA) require evaluation, per MedImpact P & T Committee Prior Authorization guidelines prior to dispensing at a pharmacy. Each request will be reviewed on an individual patient need basis. If the request does not meet the guidelines established by the P & T Committee, the request will not be approved and alternative therapy may be recommended.

If the request does not meet the guidelines established by the P & T Committee, the request will not be approved and alternative therapy may be recommended.

### B. Obtaining Coverage

Coverage, questions or information regarding the medication request or formulary process may be obtained by:

1. Faxing a completed **Prior Authorization Request** to DHMP Pharmacy Department at (303) 602-2081.
2. Contacting DHMP Pharmacy Department at (303) 602-2070 and providing all necessary information requested.

Non-approved requests may be appealed.

The prescriber must provide information to support the appeal on the basis of medical necessity. Prior Authorization is generally not available for drugs that are specifically excluded by benefit design.

#### **4. General Exclusions**

- A. Over the Counter (OTC) medications or their equivalents, except those listed on the formulary.
- B. Dietary supplements.
- C. Any drug products used for cosmetic purposes (anti-wrinkle, hair removal, hair growth)
- D. Blood or blood plasma (except anti-hemophilic factors).
- E. Pigmenting / De-pigmenting. F. Infertility.
- G. Therapeutic devices or appliances (except for formulary diabetic monitoring supplies).
- H. Investigational or experimental treatments. I. Drugs specifically listed as not covered.
- J. Foreign sourced drugs or drugs not approved by the United States Food & Drug Administration, except in certain cases of drug shortage, when allowed under the individual's pharmacy benefit.

The P & T and Formulary Committees recognize that not all medical needs can be met with this document and encourage inquiries about alternative therapies.

#### **5. Pharmacist and Physician Communication**

The Formulary is a tool to promote cost-effective prescription drug use. The P & T and Formulary Committees have made every attempt to create a document that meets all therapeutic needs; however, the art of medicine makes this a formidable task. MedImpact welcomes the participation of physicians, pharmacists, and ancillary medical providers, in this dynamic process. Physicians and pharmacists are highly encouraged to direct any suggestions, comments or formulary additions to MedImpact at the following address:
