Walgreens Healthcare Clinics
These clinics are part of the DHMP Network. You may see any Provider in the DHMP Network (some Specialist Providers require a referral first - see page 6 for more information). To find out clinic hours or for general information about a clinic, call the clinic at the number listed below. If you need to make an appointment for a clinic visit, please call the Appointment Center at (303) 436-4949. In most cases, you must go to these Denver Health clinics for your health care needs.
Thank you for selecting Denver Health Medical Plan, Inc. (DHMP). To assist you in accessing your benefits, we have developed this directory. This directory contains all active DHMP participating providers, and is current as of the date noted on the front and back cover; any additions/deletions will be reflected in future updates. If you are a POS member you have access to all physicians listed in this directory, but have the choice to find a provider outside these networks.

This Provider Directory, and all other member information, is available in other languages, Braille, large print, and audiotapes. Please call Member Services (number below) if you need this Provider Directory in a different language or form.

DHMP provides interpreter services for many languages at no cost to our members. If you would like to use an interpreter during your clinic visits, please tell the Appointment Center representative when you make your appointment. If you would like to use an interpreter for any other health care need, please call Member Services.

DHMP also offers TTY/TDD services for the hearing impaired. The TTY/TDD phone number for Member Services is listed in the “Important Phone Numbers” section on the previous page. If you need a sign language interpreter or other assistance during your clinic visits, please let Member Services know before your appointment date so arrangements can be made with an interpreter.

Enrolling in the Denver Health Medical Plan, Inc. (DHMP) HMO does not guarantee services by a particular provider on this list. Periodic changes to this list will occur as providers may be added or their participation with DHMP may change. Please be aware that Denver Health is a teaching facility and when scheduling an appointment with a specialist, you will be scheduled with the appropriate specialty clinic, not necessarily a specific physician. All doctors in this Provider Directory accept new Denver Health Medical Plan Members.

To verify a provider’s status please call Member Services. To get additional information regarding a provider’s age, gender, race/ethnicity, also call Member Services.

If a provider is certified with his/her appropriate Medical Board, It has been indicated with an asterisk “*” placed before his/her name. You may verify board certifications yourself by going to the following web page: www.abms.org. This is an online resource maintained by the American Board of Medical Specialties.

There are many DHMP providers who speak more than one language. This information is indicated by an abbreviation in parenthesis following his or her name. Please use the key to the left to identify the abbreviations

Example: *John Smith, MD (SP) (FR) means Dr. Smith is board certified in his field, and he speaks Spanish and French as well as English.
Your Primary Care Provider
Primary care providers include family doctors, internal medicine doctors, pediatric doctors, physician assistants, and nurse practitioners. You’ll find a list of in-network primary care providers in our online “Find a Doctor” directory. Member Services can also help you find physicians and provide details about their services and professional qualifications.

While you are not required to select a primary care provider, these practitioners can assist you to maintain and monitor your health as well as access the services of specialty care physicians.

Your primary care provider can help you access the wide range of medical services from our network specialists and facilities. You do not need a referral or prior authorization to see an OB/Gyn for family planning (pregnancy) services or Gynecology.

Selecting a Primary Care Provider
To find primary care providers that participate in the DHMP network, visit www.denverhealthmedicalplan.com and select “Find A Doctor/Provider.” You may also contact Member Services at 303-602-2100 or toll-free at 1-800-700-8140 (TTY/TDD users should call 303-602-2129 or toll-free at 1-866-538-5288)

You have the right to see any primary care provider who participates in our network and who is accepting members. For children, you may designate a pediatrician as the primary care provider.

Changing Your Primary Care Provider
If you decide to select a new primary care provider, there is no need to tell us. You can change your selection at any time. Our web site provides the most up-to-date information on providers that participate in the DHMP network. Or call Member Services at 303-602-2100 if you need more information.

What to do in an Emergency
In a life or limb threatening emergency situation, call 9-1-1 or go to the nearest hospital emergency room. Notify your PCP as soon as reasonably possible so that he/she can coordinate subsequent care and schedule follow-up treatment. When living or traveling outside of the network area, only emergency and urgent care services will be covered. If you or a family member have been seen at/or admitted to a non-network hospital for emergency care, you will need to call DHMP Medical Management at 303-602-2140 within 48 hours of seeking treatment or as soon as reasonably possible, so we may assist in the coordination of your care.

Visiting a Network Specialist
Specialty care is a covered benefit only when a valid referral is made by your PCP. Specialists participating in the DHMP network are listed later in this directory. You will also find listings for chiropractic care, acupuncture and massage therapy. (this benefit does not apply to CHP+ members).

Level One Physicians is a primary care clinic located on the Denver Health campus with access to on-site laboratory, radiology, and pharmacy services, Level One Physicians is here to provide care for you and your entire family. This is a primary care clinic staffed by Family Practice, Internal Medicine, and Pediatric providers. Primary OB/GYN care is also offered through Level One Physicians clinic providers. Behavioral Health Services are available on-site as well as certain limited specialty services. Care is by appointment only, but staff strive to provide same day access when available to meet the needs of your family.

Specialists, such as Rheumatology, Endocrinology and Dermatology, see patients at the Level One Physicians clinic. Front desk staff are happy to help you schedule appointments with these specialists.
